

Pascal Kienlen-Campard

Institute of Neuroscience
Université Catholique de Louvain
Brussels, Belgium

Master in Biochemistry : University of Strasbourg, France, 1991
Bioengineer : University of Strasbourg / French Government,
France, 1994
PhD in Neurobiology and Pharmacology, University of
Strasbourg, France, 1999

Associate Professor, Université catholique de Louvain, since
2005

Group leader, Institute of Neuroscience, Université catholique de Louvain, since 2009

E-mail: pascal.kienlen-campard@uclouvain.be

Phone: +32 (2) 764 93 35

Keywords

Alzheimer's disease – APP – signaling – protein dimerization – gene transcription.

Selected papers

Kienlen-Campard P, Feyt C, Huysseune S, de Diesbach P, N'Kuli F, Courtoy PJ, Octave JN (2006) Lactacystin decreases amyloid-beta peptide production by inhibiting beta-secretase activity. *J Neurosci Res*.

Kienlen-Campard P, Miolet S, Tasiaux B, Octave JN (2002) Intracellular amyloid-beta 1-42, but not extracellular soluble amyloid- beta peptides, induces neuronal apoptosis. *J Biol Chem* 277: 15666-15670.

Kienlen-Campard P, Tasiaux B, Van Hees J, Li M, Huysseune S, Sato T, Fei JZ, Aimoto S, Courtoy PJ, Smith SO, Constantinescu SN, Octave JN (2008) Amyloidogenic Processing but Not Amyloid Precursor Protein (APP) Intracellular C-terminal Domain Production Requires a Precisely Oriented APP Dimer Assembled by Transmembrane GXXXG Motifs. *J Biol Chem* 283: 7733-7744.

Sato T, **Kienlen-Campard P**, Ahmed M, Liu W, Li H, Elliott JI, Aimoto S, Constantinescu SN, Octave JN, Smith SO (2006) Inhibitors of amyloid toxicity based on beta-sheet packing of Abeta40 and Abeta42. *Biochemistry* 45: 5503-5516.

Sato T, Tang TC, Reubins G, Fei JZ, Fujimoto T, **Kienlen-Campard P**, Constantinescu SN, Octave JN, Aimoto S, Smith SO (2009) A helix-to-coil transition at the epsilon-cut site in the transmembrane dimer of the amyloid precursor protein is required for proteolysis. *Proc Natl Acad Sci U S A* 106: 1421-1426.
